

Remove ~~flies~~ from the conversation

## Our thoughts are with you during this difficult time.

We can not be there in the trenches with you in person but we are hoping that we can at least make life a little more comfortable for your horses. Please share this product with as many of your equine friends as possible. Once you have used our product and seen the results we would love to hear from you, please share your feedback and images with us so we can ensure our products are providing you with the best results possible.

# Redact

For the control of flies on horses and cattle, lice and ticks on cattle; and ants, cockroaches, fleas, flies, mosquitoes, spiders in domestic, industrial and public health areas.

Flies are a big problem for horses out in the paddock, in the stable and when travelling in horse floats and trucks.

Redact is a new product that provides a "kinder" chemistry offering you a safer and friendlier alternative than current market products. 1L of this concentrated product goes a long way. Just add 5ml into 1L spray bottle and spray directly on your horse's legs and body or spray onto the walls in your stables, floats and trucks to repel flies. Please read application instructions prior to using.

## ACTIVE INGREDIENT

Contains 200g/litre cypermethrin in the form of an emulsion

## APPLICATION

Redact may be applied by hand spraying. Redact has been approved for use on lactating animals, but care should be taken to avoid direct contamination of milk with the product.

### Redact Features and Benefits

200g/ltr Cypermethrin

WC Formulation = Oil Emulsion dispersed in water – Contains no petroleum solvents

WC liquids have 40% less drift than EC formulations

WC has a low odour profile – less fumes

WC is kinder on equipment, surfaces and applicant

Low volatility, non flammable

Zeta sized particle- smaller particle means more contact opportunity and quick uptake.

Fully recyclable packaging through **AgRecovery** program

## Safer for YOU kinder on your horse

Redact has been formulated to be extremely efficacious in the control of flies, lice and ticks on horses and cattle.

The WC formulation, with Zeta sized particles for more contact and faster uptake, achieves up to 40% less spray drift than comparable EC formulations.

Redact contains **no Xylene** has a lower odour profile and is kinder on equipment and surfaces – making it much safer for not only the treated animals but the applicator and environment as well.
